Lone Worker/Personnel Monitoring

Lone worker / Personnel monitoring safeguards the individual and any employer by offering a way of tracking where the person is at any time, if they have a fall or if they feel they are under threat so assistance can be sent.

The Qtrak Lifeband offers a discreet reliable solution that is simple to use for the individual wearing it but offers comprehensive information to whoever is keeping an eye on them, whether they are an employer, a carer or a loved one.

As the unit can also be called by one of the guardians it allows for urgent communication to be made only by those who are supposed to be talking to the wearer and it will reject calls from anyone else so there really is no need for them to have a mobile phone if you don't want them to.

1. Wristband

2. LED Wristband Status

3. Two Way Audio

4. Simple To Use Interface

5. SOS Alarm

6. Clip

Key Features:

Person Down Alert
Detects any fall or impact, and sends an alarm.
